

...Two Great Pipet-Aids that Have Paid for Themselves in Labor Hours Saved in Just One Day

Hello to all of you at Drummond
"...we recently purchased two Pipette-Aid® XL's and one Elite 400™. The day after we received them we took on a large cell culture operation involving some 86 T225 flasks and over 1000 cryotubes to be filled. The previous time we ran this protocol it took 5 people from 7:30 AM until after 5:00 PM to complete. A grueling day indeed. With the new pipettors we were astonished that we began at 8:00 AM and were finished in time to eat lunch at 11:30 AM! The best thing is that we weren't even fatigued from the experience and were able to accomplish more that day than we dreamed possible. Thanks so much for two great products that have already made our work better and have paid for themselves in labor hours in just one day! Whoever is responsible for the design of the XL deserves a raise! I've been doing cell culture for over 15 years and never with such ease and pleasure as the first day I used that pipettor."

Sincerely,

Jamie Cearley, Ph.D.
